

"THE BLOOD IS THE LIFE!"

ACCOMPLISHED

AT LAST!

THE EFFICACY

OF ELECTRICITY !!

Nearly all Diseases Effectually Cured by BOYD'S MINIATURE GALVANIC BATTERY!

Professor Boyd is now offering to the public Batteries which are made on his newly discovered principle, and of metals, amalgamated in accordance with well-known scientific principles and proportions, which, by their galvanic action upon each other, produce results not less startling than salutary. A galvanic action (i.e., electricity produced without friction) can be obtained by the union of two or more metals, as was proved, more than a century ago, by Galvani, the discoverer of Galvanism. This union of metals is characterized by a soft and gentle action, which, when applied to the body, is perceptible only in its ultimate results. For telegraphic purposes, it is necessary to intensify the galvanic action, and accordingly one of the metals is plunged into sulphuric acid, which, by corrosion, decomposes the parts exposed to it, thus facilitating their union with the other metal destined to form the amalgam. When, however, it is desired to apply the beneficial results of a current of electricity to the human body, no such intensity is required, as the simple action of the natural humidity of the skin is sufficient to set the chemical operations of nature in motion, and cause a constant but gentle flow of electricity to pass, from what we may term the BATTERY into the system.

There have been for many years back various apparatuses manufactured, which produced a galvanic action. The inventors thereof applied for patents, and in many cases secured them, and a number of the leading physicians of this country and Europe endorsed what they then supposed to be meritorious inventions, and it has been only within the last year, that Professor Boyd convinced them without a shadow of doubt, that there could be no electricity whatever passed into the system by the use of what is called Electric Belts, Bands, Chains, Plasters, etc., etc.

Professor Boyd called a meeting of the leading physicians in order to demonstrate what he claimed, which was done to the satisfaction of every one present. The Professor covered his entire body with Electric Bands, Pads, Chains, Plasters, Garters, and Belts, then stood in an upright position with his feet on a peculiarly constructed copper and zinc plate, then the Galvometer test was applied, which showed that all of the electricity contained in those appliances had passed off over the surface at the Professor's feet. This demonstrated the fallacy of such contrivances.

Many of the physicians present had endorsed some of the Chains, Bands, and Belts used for this wonderful experiment, supposing that the current did enter the system, but now, they are willing to acknowledge that they were mistaken in their views.

Then Professor Boyd produced his now famous Battery for the purpose of demonstrating to the profession his important discovery and his wonderful Miniature Battery invention. The professor, taking one of his small Batteries between his fingers, said: "Gentlemen, I will now convince you that I can pass more electricity into the system with this little invention which is sold for fifty cents, than can be done with all this costly rubbish," pointing at the bands, belts, and chains, etc., that he had just taken off. The Professor stated that his Battery was constructed of metals amalgamated in such a way and in such proportions that a strong galvanic action was produced by metals that have not heretofore been used for electric purposes. The construction of the Battery was now explained, which was to this effect: That the various blocks of metal were so placed that when the electricity was formed it would be formed in gimlet shape, and he said it would enter the system in that form and pass on twisting until it spent its force. It is claimed that electricity formed by a Battery constructed in any other way, would pass off on the surface the same as lightning when it strikes a tree or a lighting rod. The Professor now took eight Batteries, held them on his chest, and within five minutes it was noticed by the beating of the heart and pulse and the expression of the eyes, that the entire system was electrified to such an extent that it was with difficulty that the Professor could keep from dancing. This concluded the experiment, which was satisfactory to all present. A Battery was then presented by the Professor to each person who witnessed the experiments. When the great Dr. La Favel, of Paris, received his, and examined its construction, he remarked that he was satisfied, after seeing what he had and from the wonderful ingenuity in constructing the Battery, that by putting it into general use, that it would revolutionize the entire medical treatment, and added, that he had long been aware that nearly all diseases could be cured by electricity if it could be passed through the blood. He also said that a large majority of ailments were brought on by an impoverished, poisonous and vitiated state of the blood, and those diseases could only be cured by the purification of that fluid, and it seems to me, he said, that by the use of this little Battery, it will be decidedly the quickest, cheapest and most desirable way to accomplish that result. Professor Boyd, in answer, stated that it was his intention to give the public the benefit of his discovery and invention, and that he had put the price of his Battery so low that it would bring it within the reach of all suffering humanity, and that it was his desire to save neither labor nor expense in placing it properly before the American people in all parts of the United States.

The Professor said that he was glad to see, of late years, that there had been a radical change in the method adopted by the medical profession for the treatment and cure of nearly all diseases. He said it has been ascertained, beyond a doubt, that nine-tenths of all the distressing maladies originate in a vitiated state of the blood, caused by the absence of a proper proportion of electricity in that fluid, and the remedies now used are generally applied with a view of supplying the blood with its requisite quantity of electricity, and thus restoring it to its normal condition.

The celebrated HARVEY, who discovered the circulation of the blood, stated that this fluid was expelled from the heart, completed its circuit of the body, and returned to the fountain head in the space of about three minutes, and this theory has been confirmed by subsequent investigations. Thus, then, there is a constant flow of the blood, passing any given part of the body; and if, by taking advantage of this fact, we can infuse into it, on its passage, the necessary electricity, the object is accomplished without the aid of medicine or other remedies.

My Battery effectually performs this function, constantly though

imperceptibly impregnating the NERVES and the BLOOD with new electric life.

"THE BLOOD IS THE LIFE."—By its impure and impoverished condition nearly all ailments are caused, and only through its purification can those diseases be cured.

Knowing these facts, I have arrived at the conclusion that, by electrifying the blood, it stimulates the entire system, so that it enables nature to throw off nearly all diseases, and causes the blood to become youthful and vigorous in its action.

The success that has hitherto attended this BEAUTIFUL LITTLE INVENTION is fully proved by numerous Testimonials, and the unanimous opinion of Medical Men throughout the United States. This Galvanic Action, though a new doctrine to the mass, has been long known to scientific men, who, however, have been unable to discover the means of applying it, in a MINIATURE FORM, to the body; but now the difficulty has been overcome by my Battery.

It is true that the blood is the life; and it is also true that corrupt, poisoned, diseased, impoverished, and vitiated blood means DEATH. I claim, by the use of my Miniature Battery, that the blood can be so electrified as to make it as healthful and vigorous in its action as that of a child.

Whoever is subject to any of the following symptoms should wear the Battery:—Restless Nights, Nightmare, Palpitation of the Heart, Loss of Confidence, Dizziness, Fainting Spells, Loss of Memory, Fullness of Blood, Fits of Melancholy, Debilitated, Lack of Power of Will and Action, Disordered Condition of the Liver, Blood, Kidneys, or Urinary Organs—these troubles arise mostly from relaxation and debility, for the relief of which electricity is eminently adapted. By its application the affected organs are reached, vitalized and strengthened, the troubles arrested, and, wherever there is a basis for reaction, the functions can be restored to their normal health.

Why neglect your health and destroy your happiness, and recklessly throw aside all that makes life a pleasure? How many drag out year after year of a miserable existence, simply for the want of knowledge in procuring a remedy with efficacy and virtue, which would be adapted to their ailments? I say to those that procrastination is dangerous. It will not do, if you wish to live, to trifling with the human system. Then why delay, when an article is at hand that has science and common sense in its use? and in no possible way can it do you an injury, if you are not restored to health by its use.

Did you, when young, draw unnaturally on the fountain of life and strength, one drop of which fluid is equal to thirty drops of the heart's blood?

If you were so indiscreet in youth as to allow your passions to lead you to self-abuse, and it has left you with no vital power, and carried away from you your manhood, causing you to have an aversion to society and unfitted you for business, leaving your brain to run on thoughts that can be of no possible or practical use; from the above disobedience to the laws of nature, the eyes are left dim, the mind wandering, the memory lost; with difficulty you stand erect; every step taken draws on you for an effort, which makes your daily employment a burden instead of a pleasure; there is a dimness of sight, spasmodic pains in the head, a discontented feeling without knowing the cause, and the system is left in a nervous and a general debilitated condition. For the restoration of such shattered constitutions, there is no remedy that will relieve all the ailments caused from self-abuse, with such magic, as Boyd's Miniature Galvanic Battery.

The Miniature Battery will cure the following diseases, which are nearly all caused from the effects of impure blood:

Rheumatism, Gout, Swollen Joints, Neuralgia, Dyspepsia, Lumbargia, Aches and Pains, Pain in the Bones, Sciatica, Scrofula, Salt Rheum, Ulcers and Sores, Tumors, Boils, Carbuncles, Chills, Vertigo, Nervous and General Debility, Loss of Manhood, Impotency, Seminal weakness, Female Complaints, Barrenness, Liver Complaint, Fever and Ague, Bright's Disease, Kidney Disease, Diabetes, Cataract, Sore Throat, Bronchitis, Asthma, Jaundice, Pleurisy, Diphtheria, Cerebro-Spinal Meningitis, Constipation, Hysteria or Fits, Heartburn, Weak Stomach, Flatulence, Quinsy, Pustula Affections, Piles, Hypochondriasis, Deafness, Disease of the Heart, Dropsy, Gravel, Spinal Diseases, Paralysis, Weak Back, Wasting, Decay, etc., etc.

Diseases that the Battery will not cure:

Yellow Fever, Cholera, Dysentery, Croup, Congestion of the Brain, Diarrhoea, Sterility, Leucorrhœa, Gleet, Bloody Urine, Inflammation of the Bowels, Gastralgia, Influenza, Pneumonia, Spasms, Worms, Whooping Cough, and Consumption.

DIRECTIONS FOR WEARING THE BATTERY.

Each Battery is attached to a silk cord, which should be tied around the neck, so as to allow the Battery to hang as represented in the cut, and to lay on the skin. They should be worn day and night, and for at least a month after the patient is cured. Children under six years of age may wear them at night only. In extreme cases, or Chronic Rheumatism, with old age combined, or the entire loss of manhood, two Batteries may be used, one to hang on the chest and the other between the shoulder blades. But in no other cases will it be necessary to electrify the blood to such a degree.

When it is necessary to wear two, it can be done without the slightest inconvenience, as the battery is only the size and thickness of a silver half dollar. A Battery will last a lifetime without losing any of its power. **But in no case and under no circumstances should the same Battery be used by two different persons, as the disease from one would be conveyed to the other.**

They should be washed with warm water and soap every week. Many enquire the length of time it takes to cure certain diseases. I have known some severe chronic cases to be cured in twenty-four hours, and others it has taken weeks and months to cure. Some persons' systems and blood are affected by electricity much quicker than others, therefore the length of time required for a cure of the same disease differs.

The Batteries can be had at nearly all druggists in large cities, and will be supplied by my agents in small places, or sent from me by mail on receipt of price, 50 cents each.

Address all communications to

J. C. BOYD,

203 West 49th Street, New York.

Thousands of persons in all parts of the country cured of distressing maladies by wearing Professor Boyd's Miniature Galvanic Battery. The following letters were received in a few days' mail from various parts of the United States. They show the different cures made.

LONDON, Feb. 23, 1880.

DEAR SIR:

Mr. Edwards arrived yesterday; he was in the factory to-day. I was grieved to learn from him that since you had introduced your Battery in the United States, so many worthless imitations are being advertised. Is there no way to prosecute these scoundrels? Will not the American Government protect your rights? Such frauds could not be perpetrated in England, for two reasons: First, the English Government would not tolerate it; second, the English people would not be gulled with such worthless trash. It is no credit to the United States Government to allow such persons to imitate an article that you have spent eighteen years of time in inventing and perfecting. Would it not be well to state in the newspapers the fact, that no Battery on the same principle as yours could be produced in America, as they could not amalgamate the metals without destroying their electric effect, unless you gave the secret. It is not reasonable to suppose that any one in the United States could have discovered in so short a time that which has taken you so many years. Mr. Edwards says that they are applying at the Patent Office for patents on all kinds of make-ups to imitate your Battery? He says that, while he was in Washington, a person applied for a patent on a miniature battery; the galvanometer at the Patent Office was applied to the article, and it was found that it did not generate any electricity whatever. The person then made out his papers and called the article a Medal, and a patent was granted; and Mr. Edwards says that, just before he left, he saw the article advertised as a Medal Battery and patented, and it was to be worn on the chest, the same as yours. Can it be possible that the American people will believe such statements without any proofs to substantiate them? They certainly know that there was no Battery in use that was worn with a silk cord around the neck but yours, and that all those advertised to be worn in that way are frauds and imitations.

Mr. Edwards also says they have copied your Circulars and Cuts. Well, they can't steal from you the thousands of testimonials that you have, which proves what the Battery has done for the afflicted. It seems to me that any intelligent man would want such evidence as that before he would be convinced. Of course those worthless articles will not benefit any one; therefore the parties advertising them can have no genuine testimonials. Pardon me for the suggestions made in this letter, which I would not take the liberty to do were I not so vexed to hear that the introduction of so valuable an article should be impaired by such unprincipled scoundrels as there seem to be in America.

I send you a box of Batteries by to-day's steamer, the invoice of which find enclosed, and will send a lot in the future by every steamer. The orders from the Continent are daily increasing, but I will be able to supply all demands in about ten days. I will have the new drops and cutters in operation to-morrow; then I can increase the production about 20 per cent. I am sorry that I have not been able to fill your orders more promptly. The Batteries I shipped you to-day should have gone to Paris, but your manager's telegrams forced me to ship them to you. I put Willie in charge of the shipping department Monday; he feels much pleased to know a position of some importance. He is in the factory early and late, and his health is much better than when you left. I see by the Times that Edison is coming over in June; it would be pleasant if you and he would sail in the same steamer. Gas stocks are going up again since the excitement of Edison's invention has died out. I will write about the construction of the new furnaces by next steamer.

I am, sir, very respectfully, D. A. WALLACE.

To Prof. J. C. BOYD,

The above letter, received from the Superintendent of my factory, contains several suggestions and information which I think advisable to publish. I give his letter in full.

Respectfully,

J. C. BOYD,

Saginaw City, Mich., Feb. 2, 1880.

Professor J. C. BOYD:

Dear Sir—I have been cured of sciatic rheumatism by wearing one of your batteries four weeks. My wife has received great benefit in wearing a battery for nervous dyspepsia. She thinks it will soon make her well.

Yours truly,

S. DERBY.

Patterson's Store, N. C., Oct. 29, 1879.

Dear Sir—I received the Battery which you sent me about a week ago. I was given to colic and headache every day of my life before I received it. I can now say that I have had neither one since the first day I wore your Battery. I feel truly thankful for such relief.

M. C. MC BANE.

Glen Hall, Ind., Jan. 12, 1880.

J. C. BOYD:

Enclosed find money for one dozen more Batteries.

R. N. GOANS, telegraph operator and postmaster at Glen Hall, cured of pain in side of fifteen years' standing.

Two of my sisters cured of headache.

HENRY HALL, JR.

West Danby, N. Y., Jan. 8, 1880.

Prof. J. C. BOYD:

Dear Sir—Enclosed please find money for which please send me one dozen Batteries and oblige.

P. S.—I have had catarrh for fifteen years, and for seven or eight my sense of smell has not been more than half as acute as it is now, after wearing one of your Batteries for three weeks.

Yours, etc., T. HUTCHINGS.

Williamstown, N. Y., Jan. 19, 1880.

Mr. B. S. YD:

Dear Sir—Please send me one dozen more Batteries as soon as you can and some more bills with them.

I have worn one of the first that I got from you. I had the rheumatism ever since I came from the army, and had to walk with the use of a cane. I have worn the Battery about ten days, and can now walk without the cane. Some may not believe this; those that don't can write to me, and I will prove it by the whole village of Williamstown. The other two are doing great good to those that wear them.

Yours truly, J. M. BARBER.

Lancaster, O., Jan. 13, 1880.

Mr. J. C. BOYD:

Dear Sir—I have used one of your Batteries ever since November, and I have been cured of the bronchitis, catarrh, night sweats, and backache. My wife also has been cured of neuralgia, catarrh, nervousness, and night sweats. I am greatly pleased with your Batteries. I enclose \$1.50, for which you will send Batteries, in haste, and oblige

C. L. BELT.

Hopkins, Mo., Jan. 27, 1880.

J. C. BOYD, N. Y. City:

Dear Sir—The last Batteries ordered received yesterday. All sold and others wanted. They sell at sight. If I had capital I could coin money. Every one that I have sold gives satisfaction. One man took four. I have not received the circulars for the last order.

Please be sure and send them, for that is all that is necessary to sell the Batteries. In future I shall send larger orders, if they continue to sell as well as heretofore. Enclosed find \$3.00 for Batteries, and send 500 circulars. I could get plenty of certificates here if it would be of any benefit to you. Please forward the Batteries as soon as possible, as I have nothing to do until they come. I am an old woman, 70 years old, and have been hardly able to walk around the house for over one year from rheumatism, until I commenced wearing one of your Batteries in December last. I now walk over the city selling them.

SARAH M. SHEARER.

Box 232.

Lincoln, Pa., Dec. 25, 1879.

J. C. BOYD:

I am very well satisfied with your Batteries. I have them all sold, and the patients say they are helping them wonderfully. I am trying them on cases of rheumatism, neuralgia, pains around the heart, nervousness, sick headache, and fits, and all who use them speak well of them. Enclosed find \$3.00, and please send me more Batteries immediately. All sold out.

Respectfully, WILLIAM HARRISON.

Guildford, Vt., Jan. 2, 1880.

J. C. BOYD:

Dear Sir—I have been troubled with the hip disease twelve years, sick headache eight years, backache and stomachache, all of which have been cured by your miniature galvanic Battery. If I could not get another, I would not take \$19 for mine.

Mrs. F. T. NICHOLS.

Greenville, P. Q., Canada, Feb. 10, 1880.

Mr. J. C. BOYD:

Dear Sir—Your Batteries are doing a good deal of good here. I sold one to a young woman that had been troubled with headache for two years, and the Battery cured her. She has not had a headache since she put it on. They have relieved a good many of rheumatism. Also, I thank you for the circulars I received.

Yours truly, M. A. SHEPHEBD.

N. B.—I will mail on application to those desiring it, my illustrated 8 page paper, which shows the wonderful cures made by electricity. All who are affected by disease should send for it.

Georgetown, D. C., Jan. 26, 1880.

Dear Sir—Please send me six more of your Batteries, as I have sold the last and have some more engaged. I wrote to you about my brother being in such a bad condition ever since the war from exposure, and he has been wearing one of your Batteries and has become almost a new made man. The doctors here and elsewhere gave him up and told him they could do him no good.

Address,

JOHN E. SIMMONS,

360 High Street.

Dardanelle, Ark., Jan. 8, 1880.

Mr. J. C. BOYD:

Dear Sir—Enclosed find post-office order for twenty-four more Batteries. We have sold all that we have received except three. I am wearing one myself for pain in the breast. I haven't had any pain wearing it. My husband is wearing one for rheumatism; he thinks it has relieved him. Our little boy is wearing the other one; he has been sickly all of his life, having chills, spasms, and night-sweats, but has not been sick since wearing the Battery. I think that is what is helping him; as we have had several doctors, and they failed to cure him. I think they will prove to be a great blessing to suffering humanity. Please send them right away as there are several wanting them.

Respectfully,

MRS. M. D. NUNNELEY.

Atchison, Kan., Jan. 26, 1880.

J. C. BOYD:

Dear Sir—Having used one of your Miniature Galvanic Batteries for six months, I have therefore become satisfied of its benefit to me. My trouble was liver complaint and kidney affection, which have troubled me for fifteen years; but now I am entirely free from both. I obtained it from Mr. Tolbert, of St. Joseph, Mo., not knowing of any agent here; and being requested by several parties to send for some, I take this opportunity of asking your terms to an agent. Address,

J. E. LONG.

Marianna, Florida, Jan. 18, 1880.

Mr. J. C. BOYD:

Dear Sir—I have been suffering with rheumatism and neuralgia for nearly thirty years, and for the last eight or ten years I have been compelled to use my crutches frequently. I put one of your Batteries on, I think in October last, and have had no use for crutches since wearing your Battery. My general health is greatly improved. My case has established the merits of your Battery in this vicinity. I received three dozen Batteries last week and they are all sold but two. I send you nine dollars. Please send me the amount in Batteries as soon as possible.

Yours respectfully,

WM. E. FULGHAM, Agent.

Ellijay, Ga., Jan. 23, 1880.

Prof. J. C. BOYD:

Dear Sir—You will please find enclosed seventeen dollars for Batteries. You will please send them to Ellijay, Ga. Prof. Boyd, I have sold forty-two of your Batteries, and I haven't heard any grumbling; they are all pleased with them. They all say they would not take \$3 apiece. I sold Mr. Perry Sutton two; he was down with rheumatism, and hadn't walked any for one month, and in two weeks he was up and going about.

Yours truly,

J. L. TANKERSLEY.

Prairie du Chien, Dec. 26, 1880.

J. C. BOYD:

Enclosed please find pay for half dozen Batteries. I hope to increase the sale when they are better known, as the best results are reported by those who are wearing them.

One woman, to whom I sold a Battery a month ago, told me yesterday she had not lost one night's sleep since she put it on, a month ago. Before that she had not had a night's rest for months. Her disease was acute rheumatism.

I wear on, and find my nerves quieter than they have been for years.

Yours, etc.,

M. M. GORDON.

White Hall, Pa., Jan. 19, 1880.

Mr. J. C. BOYD:

Send me twelve Batteries for this check, and oblige. The Batteries sell well here and are doing well. I have an old gentleman here seventy-eight years old; when I got the first Batteries from you I sold him one; he was entirely lame with rheumatism, he could not raise his arm, and now he is well and can do any kind of work; he says if any person would give twenty-five dollars to him for his Battery, and he should have none, he would not give it; so with all the rest I sold to, all doing well. The book you sent me is a nice one; I ought to have a few more. I have a few agents out. Have you no larger bills to hang up in my store? I will now have to get a dozen each week to supply my demand for them. Send right off, and oblige.

WM. A. McSHERRY.

Christianburgh, O., Jan. 12, 1880.

Mr. J. C. BOYD:

Sir—I have been testing your Batteries on father and mother; they are working a miraculous cure on them. Father has been bothered with rheumatism and cramps in his limbs ever since he was a boy; now he is seventy-four. He has not been bothered with either since he put on the Battery. Mother has not been able to thread her needle for several years. She can do it with ease now.

I have let out all your Batteries, and they are having good effect. Some persons of this vicinity are thinking of sending to you for Batteries, thinking of getting them cheaper. If you wish me to act as your agent, you must charge them the retail price. Please send me by return mail twenty-four of your Batteries. If they prove as good as the others, I can be of good service to you.

Yours truly,

M. EDMINSON.

Chico, Cal., Jan. 30, 1880.

Mr. J. C. BOYD:

I received the last two dozen Batteries which you sent me. They are all sold but two, and I want you to send me one dozen more as soon as you get this letter. Your Batteries are doing much good. I. Cimble, cured of rheumatism; my wife, nearly cured of salt-rheum; myself, of chills and fever; and they are helping every one that I have sold to yet.

Yours truly,

JOHN VICKERS, Agent.

Sitka, Ind., Jan. 27, 1880.

Mr. J. C. BOYD:

Dear Sir—I have tried your Battery on my wife, and it works like a charm, so much so, she says, she would not take five hundred dollars for it, for she has suffered with neuralgia for sixteen years, and is now almost well. Please send me more Batteries; I will send you the money (\$3.00) in this letter.

Respectfully,

A. J. KITCHEN.

Grenola, Kan., Jan. 1, 1880.

Mr. J. C. BOYD:

Dear Sir—Please find enclosed \$3 for some of your Batteries. My wife has been bothered for about nine years with rheumatism and pains in her shoulders, and numbness in her arms. She has been wearing one for three weeks and is now well, and has more life than she has had for ten years. She says she never felt so supple in her life. She is the mother of nine children. There are many wishing to get them. Please send soon to

WM. T. FUSON.

Milltown, Me., July 8, 1879.

J. C. BOYD:

Dear Sir—When I sent for one of your Batteries, I was prostrated by neuralgia, pains around the heart, nervousness, loss of appetite, sleepless nights, etc. I commenced to wear it as soon as I received it, and have been benefited by it, and am expecting to be made whole. I will accept the agency.

Respectfully,

Mrs. LUCY C. SMITH.

Oakland, Garrett Co., Md., Jan. 27, 1880.

Mr. BOYD:

I want you to send me eighty of your Batteries. They seem to do good. It has cured me of heart disease and the piles, and all that have got one have been relieved. Please send them by next mail.

THOMAS J. MORELAND.

Monroe, Hart Co., Ky., Jan. 17, 1880.

Dr. J. C. BOYD:

Dear Sir—The dozen Batteries ordered are all sold before they have arrived, and more ordered of me. They are giving relief in many almost hopeless cases. I am wearing two for rheumatism and stiffness. I have not been able to put my hands over my shoulders for several years until now. I can put them over or under with but little pain. A lady has been under the doctor's care for months with heart disease, suffering with constant headache and nervous debility; headache and nervousness ceased on that day and has had no symptoms since, now about four weeks. Others speak in like flattering terms. Enclosed please find \$5.00, and send me its worth by return mail to this office, and oblige, yours, etc. If you have not sent circulars with my last order please send some with this lot. My age is 63 years.

PHILIP MAXEY.
